

Dear visitor,

my name is Franziska, I am a young mother and originally from lower Saxony, Germany. Because my husband got the opportunity to add some experience abroad to his job we decided to come to Louisiana.

I used to work as a physical therapist in Germany, I also taught future pts in inner medicine. And my latest class I took was occupational health and prevention. So far it is my favourite topic to teach. Sadly my degree doesn't get recognized in the United States but I decided to not let this stop me from working for my dreams.

I always wanted to start my own business. Since I am little I am used to have people around me who already own a business. My parents were a great example for that. They own their own business back home in Germany as well.

As a life coach and advisor I won't be able to help you out on orthopedic issues and problems anymore but I can teach you how to prevent, I can present techniques, inform you about green and red flags in your daily life and help you find the right amount of sport, work, wellness and just life.

I know I am not perfect but I am confident in what I do and what I know. Give me the opportunity to prove my knowledge and I am sure you won't be disappointed.

My hobbies are:

Sports, Outdoor activities of any kind, my dog and family and handcrafts

My best talent:

I can be very creative in handcrafts, decoration and finding solutions for problems

My biggest inability:

I am not a good baker, I am a very slow runner even though I train and I often forget my jacket somewhere

My wish for the future:

Having a working business, a healthy and happy family and the will to reach out for new adventures

FLAMINGO

Franziska
